INTRODUCTION.

A long experience as teacher of Articulation and Pronunciation in one of our leading schools of Elocution and Oratory has afforded opportunity for discovering in what directions are to be found the principal orthoepical faults, not only of public readers and speakers, but of all classes of persons, and in what particulars most assistance is needed.

GUIDING PRINCIPLES.

Accuracy, clearness, and conciseness have been the guiding principles in the compilation of this manual. The latest unabridged editions of Webster and Worcester, including their supplements and valuable lists of geographical, biographical, classical, and scriptural names, have been thoughtfully consulted. The words most liable to be mispronounced have been carefully selected, and their pronunciation has been set forth in the clearest and most unmistakable manner.

IMPORTANCE OF A KNOWLEDGE OF THE ELEMENTARY SOUNDS.

No person can be sure of the pronunciation of a word as found in the dictionaries without possessing a knowledge of the elementary sounds of the language. These sounds, in turn, depend upon a knowledge of the meaning and use of the diacritical signs. The following table will serve to show the system of notation employed in this book, and also the systems employed by Webster and Worcester. Simple key-words have been chosen, such as are familiar to every English-speaking person. The three words at the end of the list, are, perhaps, exceptions. These are used to represent sounds heard in the pronunciation of certain classes of foreign words which are occasionally met with in books, newspapers, and magazines. For the peculiar sounds here employed, we have no English equivalents. The student desiring information or instruction on these few sounds, will find, in almost every community, persons of linguistic culture, or those of foreign birth and education, who will be pleased to give the needed help.

EQUIVALENTS.

In Webster's "Key to Pronunciation," and in Worcester's "Key to the Marked Letters," other markings are employed than those found in the annexed table. It will be observed that these are simply equivalents, and do not represent additional sounds. The *a* in *what*, for example, represents the sound of *short o*; the *e* in *there*, represents

the sound of *a* in *fare*; the *i* in *police* is an equivalent for the *e* in *mete*, etc. These characters are employed by the lexicographers to economize space by avoiding the respelling of the word. Worcester, in his supplement, has introduced a new marking for *u* as in *annual*. This sound being simply the obscure *long u*, without accent, no place has been given it in our table.

DIACRITICAL MARKS.

As the pronunciation of this volume is intended to conform to that of the unabridged editions of Webster and Worcester, it is proper that the diacritical signs should also conform, so far as possible, to those employed by these eminent lexicographers. Accordingly, in all cases where they agree in the use of the same signs to represent the same sounds, like signs have been adopted in this volume. When they differ, those markings have been chosen that seem best suited to the case.

The tendency of the times is toward fewer diacritical signs, hence, in all the later works on orthoepy, in the new dictionaries, and in the supplements and revisions of the old standard works, the authors and revisers depend more upon a simple and careful respelling of the word than upon the use of a complicated system of notation. By respelling only the difficult and doubtful parts of the word, and by other abbreviated processes, little is lost in space, and much is gained in simplicity and accuracy.

TABLE OF ELEMENTARY SOUNDS,

WITH SUITABLE KEY-WORDS, SHOWING THE NOTATION EMPLOYED
IN THIS VOLUME, AND ALSO THAT OF THE UNABRIDGED
DICTIONARIES OF WEBSTER AND WORCESTER.

| Key-words. | | | Web. | Wor. | Key-words. | | | Web. | Wor. |
|------------|----|----|------|------|------------|----|----|------|------|

REMARKS ON THE SOUNDS, WITH CAUTIONS AND SUGGESTIONS.

1.—As most of the sounds are generally uttered in a correct manner, it will be necessary to refer to those only that are most liable to incorrect use.

2.—The music of speech depends so largely upon the vowel sounds that especial care is needed in the manner of uttering the vowel element in the large classes of words represented by the following key-words from our table: *fate, fat, fare, mete, met, pine, pin, out*. Guard especially against those harsh, discordant sounds produced by the wide, flat mouth, with teeth close together, and the muscles of the throat tightly tensioned. The faults here referred to prevail less in the Southern than in the Northern States.

3.—The vowel sound in *fall* (*broad a*) is often incorrectly changed to *short o*, in such words as *taught, caught, fought, thought, water*, etc.

4.—The vowel sound in *fare* is, in some localities, often made like *short a* as heard in *farrier*, with the *a* prolonged.

5.—The vowel sound in *fast*, when properly made, is a rich musical sound. It is heard chiefly in monosyllables ending in *ff, ft, ss, st, sk, sp, nce, nt*, and in derivations from these words. It is longer and more decided than the unaccented *a* in *soda, idea, sofa*. The sound is in strict harmony with Worcester's vowel of the same marking, and with Webster's vowel marked with a period over the letter when this character is employed to represent the vowel sounds in monosyllables and in accented syllables. It should not be corrupted into *short a*, as in *fat*.

6.—The *a* sound in *flora*, is, in this volume, employed to represent the obscure sound of *a* when it either forms or terminates an unaccented syllable. Its place in a graduated scale of sounds is between *intermediate a*, as in *fast*, and *Italian a*, as in *far*. It is in strict harmony with Webster's vowel of the same marking, and with Worcester's vowel marked with a period underneath, when they are found in the same situation. This sound is here given a fixed character, while the corresponding sounds of Webster and Worcester are variable.

Webster says of this *a* that it "has properly a brief sound of *Italian a*, as in *Cuba, America, amuse*; but in familiar speech, it is almost always so slighted and obscured as to be undistinguishable from the neutral vowel, or *u* in *urn*." Instead of making it *Italian a*, he uniformly gives it the sign of *intermediate a* at the end of a word (see *comma, dogma, era, gala, mica*), and leaves it unmarked at the beginning or in the middle of a word (see *abound, amuse, bombazine, decalogue*). It is believed that the thoughtful student will approve the giving of a distinct place in the table to *unaccented a*, thus distinguishing between the sounds of *a* in *cast* and in *comma*, according to Webster's marking, and between *terminal a* in *stamina*, and that broad range of *a* sounds represented by the key-words *liar, palace, courage, abbacy*, in Worcester's table.

7.—The sound of *e* in *her* must not be confounded with *u* in *fur*.

8.—The sound of *short o* should not be allowed to merge

into *broad a* in such words as *dog, on, God, long, off, soft, thong, throng*, but should be given the *short o* sound with a long quantity.

9.—Webster and Worcester regard the sound of *o* in *corn* as an equivalent for *broad a*, as in *caw*. As the letter *r* greatly modifies all the vowels that immediately precede it, especially those having long quantity, this sound has been given a separate place in the table. The *long a* modified by *r*, becomes the *a* in *fare*, and, by most orthoepists, is given a distinct place in the table of sounds. The *o* of *note* is, by Bell, distinguished from the *o* in *ore*. So the *o* in *torn* is, by most Americans, sounded ~~as~~ like the *a* of *tall*. The English, Scotch, and Irish, preserve the *broad a* sound more fully in this class of words than Americans do, but, according to Webster, the *o* in the noun *form* is, in England, sometimes sounded like *long o*, and sometimes like *broad a*, depending upon its meaning. This is, to say the least, confusing. Perhaps the increasing attention now given to phonetics will result in a more systematic and satisfactory table of vowel sounds. In the meantime, those that prefer may give to words like *lord, form, horse, scorn, the full broad a* sound, while others may modify the vowel element.

10.—After the sounds of *r* and *sh*, the *long u*, as in *rude, shute*, is changed to *long oo*; but after *j* and *ch*, the sound of *long u* is retained, as in *jute, chew*, but care should be taken not to prolong the vowel in the utterance.

11.—Worcester marks the *o* in *move* with the caret, but doubles the marking in *mood*. When he respells the

word he uses the single vowel with its appropriate character.

12.—In this book, always sound *ou* as in *out*, not as in *ghoul* nor as in *soul*. Make the initial sound of this diphthong *Italian a*, not *short a*.

13.—The letter *g* must be sounded as in *get*. When *soft g* is intended, the letter *j* is generally employed to represent the pronunciation.

14.—The letter *r* is smooth when it follows a vowel, as in *car*, *her*, *nor*, *fur*, and vibrant or trilled when it precedes the vowel, as in *thrill*, *crash*, *break*. Young elocutionists are apt to overdo the trill, using it often where it should not be used, and intensifying it where it should be used lightly.

15.—Do not sound *s* like *z* in the column of phonetic analysis.

16.—Do not mistake the *vocal th*, as in *than* for the *aspirate th*, as in *thin*.

17.—Do not sound *ch* like *sh*, or *k*.

18.—The letter *z* following *t* becomes *s*, as in *Metz*.

19.—Persons who are unable to make the *German ch* should use the sound of *k*, a sound frequently employed in the dictionaries. (See *Richter*.)

20.—*French n* (marked ñ) simply nasalizes the preceding vowel. It is heard in the English word *song*. Prolong the vowel, giving it a strong nasal quality, and stop before the tongue rises to the roof of the mouth for the *ng*, and the ear will readily detect the sound intended.

Webster represents the sound by *ng*. Worcester employs *ng* in the body of his dictionary, but substitutes *ñ* in the supplement.

21.—If the student will sound the vowel in *ooze*, and, without changing the mouth position, attempt to sound *long e*, he will produce a sound closely approaching *French u*. Worcester employs the *û* in his supplement and in the pronunciation of geographical and biographical names. Webster employs *ü* in the pronunciation of geographical and biographical names, but not in his supplement. Both substitute *long oo* for that character in the body of the dictionary.

UNACCENTED TERMINATIONS.

22.—Train the organs of articulation to strike the unaccented vowels clearly and distinctly, and yet gently. A secondary accent sharpens the vowel slightly.

23.—The unaccented terminal syllables *ar*, *er*, *ir*, *or*, *ur*, *yr*, are, by most persons, pronounced with no perceptible difference, all being sounded like *ur*. Although some orthoepists indorse this usage, it is better to make a distinction.

While it is hardly to be expected that persons of mature years who have always pronounced these syllables alike, will take the trouble to educate their organs of speech to make this distinction, children whose organs are pliable, and whose pronunciation is in the formative period, should be diligently trained to do so. All young men and women who

aspire to an elegant and cultured speech, all young clergymen who aim to teach pure morals through pure English, and especially all teachers of reading and elocution, should practice upon words terminating in the above syllables until they can make the distinctions with ease and grace, and without any show of pedantry or affectation.

The *ar* is the same as heard in *tar*, the vowel being made obscure by the absence of accent and softened by the *r*.

The *er* is the same as heard in *her*, the vowel being very short, soft, and quite obscure, being closely blended with the *r*.

The *ir* and *yr* are identical with *er*.

The *or* is the same as heard in *nor*, the vowel being short, soft, and obscure, and leaning toward *ur*. (See 9.)

The *ur* is that heard in *fur*, and can scarcely be mistaken. It is the sound toward which the others strongly tend in the mouths of most persons. The vowel is almost inseparable from the *r*, and is, by some orthoepists called the *natural vowel*, being made with so little effort of the articulatory organs.

24.—(—al). Short *a*, obscure, as in *metal*, not *metul*, nor *mettle*; *pedul*, not *pedul*, nor *peddle*.

25.—(—as). Short *a*, obscure, tending slightly toward short *u*, as in *Judas*, *upas*.

26.—(—ain). Short *i*, as in *captain*, *fountain*, *certain*.

27.—(—ard). Italian *a*, obscure, tending slightly toward *urd*, as in *laggard*, *niggard*, *awkward*.

28.—(—ate). In verbs, long *a*, slightly obscured, as *cal-*

culate, regulate, articulate, vacate, usually having a slight secondary accent.

In nouns and adjectives, *long a*, very obscure, tending toward *short e*, as in *primate, chromate, chocolate, delicate, intricate, articulate, ultimate*.

29.—(—any). *Long a*, obscure, tending toward *short e*, as in *miscellany, castellany*, when it has the secondary accent. Some orthoepists give it the sound of *short e*. Without accent, as in *company, litany, botany*, the *a* has the usual sound, as in *flora*.

30.—(—ary). *Coalescent a*, as in *fare*, tending toward *short e*, when it has the secondary accent, as in *capillary, customary, ordinary*. Some orthoepists give it the sound of *short e*. When the accent falls on the antepenult, as in *ple-nary, granary, primary*, the *a* is the same as in *flora*.

31.—(—el). *Short e*, when sounded, as in *level, vessel, travel*; often silent, as in *chattel, hazel, shekel, shovel*.

32.—(—en). *Short e*, when sounded, as in *chicken, hyphen, kitchen*. More frequently silent, as in *heaven, even, given*.

33.—(—ery). *Short e*, when it has the accent, either primary or secondary, as in *very, monastery, millinery*. *Coalescent e*, as in *her*, when without accent, as in *mystery, battery, slavery*.

34.—(—il). *Short i*, and generally sounded as in *cavil, civil, fossil, pencil*. Silent in a few words, as *evil, weevil, devil*.

35.—(—in). *Short i*, generally sounded, as in *cabin, satin, matin*. Silent in a few words, as *basin, raisin, cousin, ravin*.

36.—(—ine). No broad general rule can be formulated. The *i* is frequently short in chemical terms, as *bromine*, *chlorine*, *benzoline*; also in other words when the accent falls on the penult. It is often long when the accent falls on the antepenult, as *crystalline*, *turpentine*, *serpentine*. In words derived from the French, the *i* often takes the sound of *long e*, as *guillotine*, *quarantine*, *ravine*.

37.—(—ile). Like the *ine* termination, no general rule can be laid down. Accent on the penult often makes the *i* short, as *fertile*, *reptile*, *hostile*, and on the antepenult, often makes it long, as *reconcile*, *camomile*.

38.—(—ide). In chemical terms, as *bromide*, *iodide*, *sulphuride*, Webster usually employs the *short i*, and Worcester the *long i*.

39.—(—ite). *Long i* is most frequent, especially in mineralogical terms.

40.—(—on). *Short o*, leaning strongly toward *short u*. It often takes the sound of *short u*. When preceded by *c*, *ck*, *s*, *t*, the vowel is generally suppressed.

41.—(—ort). Like *urt* in *liverwort*, *spearwort*, and similar botanical terms.

42.—(—oth). *Short o*, leaning toward *short u*, as in *mammoth*, *behemoth*.

43.—(—ony). *Long o*, tending toward *short u*, as in *harmony*, *symphony*.

44.—(—ory). *Long o*, closely blending with *r*, and tending toward *short u*, as in *cursor*, *history*.

45.—(—ure) *Long u*, clipped and softened, as in *nature*,

culture, future, verdure. Avoid the sharp *long u* of the pedant as you would the uncultured *ur* (*na-chur, ver-jur*) of the rustic.

ACCENT OF FOREIGN WORDS.

In the pronunciation of many foreign words, especially those of French origin, Worcester regards the syllables as having equal stress, and omits the marks of accent. Webster usually indicates the accent. See *chalet, chignon, croquette, étude, fichu*. Where a choice is allowed between an anglicized form of pronunciation, and a foreign form, the English form is usually given the preference, especially if the word is one in common use.

PLAN AND PURPOSE OF THE BOOK,

Each page in the body of the book is divided into three columns.

The **FIRST COLUMN** gives the word, in clear, bold-face type, easily caught by the eye, without mark or division, just as we find it in books, newspapers, and magazines. The character (*), frequently found in this column, means "see Appendix," and implies that there are two or more forms of pronunciation recognized by Webster and Worcester. The form that seems to have the greater weight of authority is the one given in the body of the book. Other forms that have good sanction will be found in the Appendix. Such forms as have little authority are omitted. When Webster and Worcester differ in the pronunciation of geographical terms, Lippincott's Pro-

nouncing Gazetteer of the World has frequently been consulted to assist in determining which pronunciation shall go into the body of the book. The same word often represents several parts of speech. When the pronunciation is unchanged the word is given but once; when it changes with the grammatical use of the word, the several forms of pronunciation are given, accompanied by letters indicating the part of speech represented. A list of the abbreviations employed in this volume will be found on page 17.

The SECOND COLUMN gives the pronunciation in the simplest possible manner. Many persons are not familiar with the diacritical signs employed in dictionaries and books of pronunciation, and for that reason the orthography and general appearance of the word are preserved as fully as possible. The number of syllables and the place of the accent are clearly marked. Changes of spelling and diacritical signs are employed only where there is a probability of the pronunciation being mistaken. Such endings as *tious*, *cious*, *ceous*, *tion*, *cion*, *sion*, *tous*, *lous*, *phy*, etc., are uniformly represented by the simple and regular forms, *shus*, *shun*, *tus*, *lus*, *fy*, etc.

The THIRD COLUMN represents a close phonetic analysis of the word. It will be found of great value to all students of phonics, and to those that are familiar with diacritical marks it will serve to represent more exactly the pronunciation of the word. Every vowel is marked; every silent letter is omitted; every accent, primary and

secondary, is noted, except where the secondary is not deemed sufficiently strong to demand a sign; and the largest liberty is taken with the spelling in order to represent in the most accurate manner the pronunciation intended. Every letter and every digraph in this column must be sounded. Every character must receive the sound assigned to it in the table. *S* must not be sounded like *z*, nor *g* like *j*, nor *ch* like *sh* or *k*. The figures refer to the paragraphs of the same number in the Introduction.

ADAPTATION.

The practice of consulting a dictionary is not readily acquired, and should, therefore, be made an essential part of school work, until, by frequent repetition, it becomes habitual. The size of the larger dictionaries often forbids their use by younger pupils. This volume will be found very convenient for either study or reference, and is adapted alike to the wants of public and private schools, and to the needs of the general student.

As difficulties in the spelling frequently accompany difficulties in pronunciation, this book may be used by advanced classes in both branches. Most teachers will readily find means of adapting it to the double purpose named. To some the following suggestions may be of value: Have the pupil rule his blank-book or paper for two columns if the page is narrow, or for four columns if the page is wide. The teacher will then dictate a column of words from this book, which the pupil will carefully spell by writing in the first column of the blank-book. This constitutes not only a valuable spelling exercise, but also an exercise in pronunciation, for the pupil's knowledge of the sound of the word is both strengthened and made more exact by the teacher's dictation.

The pupil will then proceed to write the pronunciation in the second column of his blank-book. If he has been made acquainted with the use of diacritical marks, he should follow the plan of the third column of this book. If he has not thoroughly mastered them, he had better

employ the method adopted in the second column of this volume. The examination and correction of the work by the teacher may follow the usual methods employed in the school.

As it is possible for the pupil to write correctly the pronunciation of a word, and yet not be able to pronounce it orally, the teacher should have the class give back the words to him sufficiently often to assure him that they can correctly interpret the signs they employ.

Teachers and school superintendents will find this volume very convenient for the purpose of making up lists of test-words for examination in pronunciation and spelling.

APPENDIX.

The abbreviation Wb. represents Webster.

| | | | |
|---|-----|---|-------------|
| " | Wr. | " | Worcester. |
| " | P. | " | Porter. |
| " | L. | " | Lippincott. |

Noah Porter, D. D., LL. D., late President of Yale College, supervised the editing of the new Webster's Condensed Dictionary. Lippincott's Pronouncing Gazetteer of the World was frequently consulted in determining the pronunciation of geographical terms for this volume. When several pronunciations are connected by the word *or*, the order of preference of the accompanying authority is indicated.

ABSINTH.

ab sinth', Wb., Wr.; **ab' sinth**, P.
ab solve', Wb., P.; **ab zolve'**, Wr.
ac cess', or **ac' cess**, Wb., Wr., P.

Many speakers follow the general law of accent, and adopt the second pronunciation.

ac ces' sa ry, Wb., P.; **ac' -**, Wr.

ac ces' so ry, Wb., P.; **ac' -**, Wr.

 eg' lan tine, or -tin, Wr., Wb., P.
 e' go tism, Wb., P.; ē' go-, or ēg' ō-,
 Wr.
 either, ē' ther, Wr.; ē-, or i-, Wb.,
 P. Webster says that analogy, as well as
 the best and most general usage, is decidedly
 in favor of *e' ther*. Worcester makes the
 accented vowel *long e*, and, quoting Walker,
 says that analogy, without hesitation, gives
 the diphthong the sound of long open *e*,
 rather than that of *i*; and, quoting Smart,
 says that usage, as well as regularity, favors
 the sound of *e* in these two words (either or
 neither). Stormonth's Dictionary also places
e' ther before *i' ther*. With such weight of
 authority in favor of *e' ther*, it seems like
 affectation to exchange that form for *i' ther*.

hearth, hārth, Wb., Wr.; hārth, or hērth, P.

heaths. The plural should be pro. hēaths. not hēathz. So also truths, youths, breaths.

heather, hēth' er, Wb., P.; hēth' er, Wr.

He' bra ist, Wb., P.; hē' bra-, or hēb' ra-, Wr. While the general law of pro. and the absence of any mark in the dictionaries to indicate the sound of *a* in this and several related words (Hebraim, Hebraize, Hebraistic, etc.), would lead to the conclusion that the sound should be that of unaccented intermediate *a*, as in Cuba, America, flora, which is probably the sound intended by Wb. and Wr., it will be found that the vowel following tends to lengthen the *a* (as in *aorta*, *chaotic*, *aerial*), and to require a sound closely approaching to, if not identical with, *long a*.

hec tare', Wb.; -tār', P.; hēc' tār, Wr.

hec tol' i ter, or hēc' tō li ter, Wb., P.; hēc' tō lē ter, Wr. The French form *hectolitre* is pro. êk tō lē' tr, Wb.; hēc' tō lē' tr, Wr.

 hin' don, Wb., P.; -dōō', Wr.
 holm, hōme, Wb.; hōlm, Wr.;
 hōlm, or hōm, P.

hook' ed, or hōōkt, Wr., Wb., P.

hoop. The pro. of this word varies greatly with its meaning. As a noun, meaning a ring or circle of any material, it is pro. hōōp, or hōōp, Wr., Wb., P. To these meanings Wb. and P. add "a quart pot" originally bound with hoops; and Wb. adds, "a measure variously estimated from one to four pecks." With the last meaning Wr. pro. it hōōp. When it means "a shout" (commonly written *shoop*), or a bird, the hoopoo, it is pro. hōōp, Wb., Wr. All the verb meanings Wb. and P. pro. hōōp. To bind with hoops, to clasp, hōōp, or hōōp, Wr., to shout, to drive, etc., hōōp, Wr. Hence hōōp is the preferred pro. of all the authorities in every case, whether noun or verb.

horned, *ad.*, Wb., P.; hōrn' ed, Wr.

sub al' tern (-awl'-, Wb., P.; sub'-al tern, or suo awl'-, Wr.
suc'cumb', Wb., Wr.; -kum', P. While Wb. and Wr. sound the *b* in this word, thus giving to that form of pro. what seems to be the higher authority, yet, guided by Webster's "Principles of Pronunciation" (see 82, Consonant B), by Porter's pro., and by the almost universal practice of the best speakers, we have departed from our general rule and have given in the body of the book the pro. that has the weaker sanction of the dictionaries.
suggest, sūg jest', or sūd-, Wb., P., Wr.
su'icidal, Wb., P.; sū'-, Wr.
sul'ta'na, or -ūk-, Wb., P., Wr.
sumac, sōō' māk, Wb.; sōō'-, or suōō'-, P.; shōō'-, or sū'-, Wr. Colloquially, shōō' mak, Wb.
su'per'e rog'a to ry, Wb., P.; -ēr'-o ga-, Wr.
superficies, sū' per fīsh' eez, Wb.; -fīsh' eez, or -fīsh' i eez, P.; -fīsh' i ēz, or fīsh' ēz, Wr.
su'per'fine, Wb., P.; -fīne', Wr.
surveillance, sūr vāl' yānce, Wb.; sēr vāl' yōns, P.; sōor vāl' yāns', Wr.
swath, swāth, Wb., P.; swōth, Wr.
swingel, swing' gl, Wb., P.; swīn'-jēl, w. r.
symposium, sīm pō' zī ūm, Wb., P.; -zī-, or -zhī-, Wr.

tab'erna'cle, Wb., Wr., P. While the secondary accent properly preserves the *long a*, many persons make the *a short*, and not a few change it to *short i*.
Tal' mā, or tāl mā', Wb.; tāl mā', Wr.
ta'pis, or tā pē', Wb., P.; tāp' ē, or tā' pīs, Wr. As a verb, tāp' īs, Wb., Wr.
taunt, tānt, Wb., P.; tānt. or tawnt, Wr.
te'dious, or tēd' yus, Wb., P.; tēd'-yus, Wr.
Teheran, tē hrān', Wb.; tē h'rān', P.; tē hār ān', Wr.
te'les'copy, or tēl' ēs cō pīst, Wb.; tēl' ē sōō pīst, or tē lēs'-, Wr.
ten'ure, Wb.; tēn'-, or tē' nūre, Wr.; tēn' yer, P.

āte, āt, ārm, āwl, ālr, āsk, erā, ēve, ēnd, ērr, lee, in, ōld, ōn.

Terre Haute, tēr' ē hōte, Wb.; -hōte', Wr.; tēr' rē, P.

therefore, thār' fōr, or thēr'-, Wb.; thēr'-, or thār'-, P., Wr.

thereof, thār' ōf', or -ōv', Wb., P.; -ōf', Wr.

therewith, thār' with', or -with', Wb., P.; -with', Wr.

Theseus (*Cl.*), thē' sē ūs, or thē'-sūce, Wb., P.; thē' sūce, Wr. As an adj., thē sē' ūs, Wr. In Shakespeare's *Midsummer Night's Dream*, thē'-sē ūs, or thē' sūce, Wb.

Thorwaldsen, tōr' wald sēn, or tōr'-vāl zēn, Wb.; -wald sn, or -vāld-sn, P.; -wāl sen, Wr.

ti a' rā, tī ā' rā, Wb.; tī ā' rā, or -ār'-ā, Wr.; tē ā' rā, P.

tierce, tērse, or tērse, Wb., P., Wr.

ti rade', tī rāde' Wb., P.; -rād', Wr.

Tiv' o li (*U. S.*), tīv' ō lī Wb.; (*Italy*) tīv' ō lē, Wr.; tē' vō lē, Wb.; tīv', or tē', P.

to ma' to, tō mā' tō, or tō mā'-, Wb., Wr.; -mā'-, P.

tortoise, tōr' tīss, Wb., P.; -tīz, or -tīs, Wr.

tout-ensemble, tōōt-ōn sōn' bl, Wb.; tōō tān sān' bl, P.; tōōt' ān sām'-bl, Wr.

trachea, trā' kē ā, Wb., P.; trā'-, or trā kē' ā, Wr.

Traf al gar', or trā fāl'-, P.; Cape Trā fāl' gār, or trā fāl gār', Wr.; Cape Trāf āl gār', Wb.; trāf āl-gār' (*U. S.*), Wr.

trait, trāte, Wb., P.; trāte, or trā, Wr. Wb. says this word is, to some extent, pro. trā in England, but in the U. S. the final t is always sounded. Wr. says this word is now so fully anglicized as to be properly pro. as an English word.

transition, trān sīzh' ūn, Wb., Wr.; -sīzh' un, or -zīsh' ūn, P. If we have in this instance, departed from our general rule in not putting in the body of the book the preferred form of Wb. and Wr., it is because all analogy, as well as general usage, is in favor of the form there presented. Wb. discusses the pro. at considerable length, the whole tenor of the discussion favoring the pro. we have adopted, and, in conclusion, says, "this practice seems worthy of encouragement as tending to reduce the number of anomalies in the almost impracticable

orthoepy of our mother tongue." Walker says this word "may be classed among those varieties, where we shall neither be much applauded for being right, nor blamed for being wrong."

treasure, trēzh' ūr, Wb., Wr.; -ēr, P.

treatise, trē' tīs, Wb., P.; -tīz, or -tīs, Wr.

tre' mor, or trēm'-, Wb.; trē'-, Wr.; trē' mēr, or trēm'-, P.

Triest, trē' ēst', Wb., P., Wr. When spelled Trieste, pro. trē' ēs' tā Wb., P.

trij' u gous, or trī jū'-, Wb., P.; trī jū'-, Wr.

tri lo' bate, trī lō' bāte, or trī'-, Wb., P.; trī'-, Wr.

tri' o, trī' ō, or trē' ō, Wb., P.; trī' ō, Wr.

trip' ar tite, or trī pārt' ite, Wb., P.; trip'-, Wr.

triphthong, trīf' thong, or trip'-, Wb., P.; trip'-, Wr.

triphylous, trīf' il ūs, or trī fil'-, Wb.; trī fil'-, or trīf' il-, Wr.

triplanchic, trī splank' nic, Wb.; tri-, Wr.

trom' bone, Wb., P.; trōm bō' nē, or trōm' bōn Wr.

trough, trawf, Wb., P.; trōf, Wr.

tuberoze, tūb' rōz, or tū' ber ōce, Wb.; tūb' rēz, or tū' ber ōz, Wr., P. As an adj., tū' ber ōce, Wb.; -oce', Wr.

Tucson, tū sōn', Wb.; tōō, Wr.

Tulare, tōō lā' rē, Wb.; -rā, Wr.; tū lāre', L.

Tu nls' lan, Wb.; tū nīzh'-, Wr.

turco, tūr' kō, or tōōr'-, Wr.

turquois, tūr kōiz', or -kēez', Wb., P.; -kweez', or kwolz', Wr.

twelfth. This word is often mispro. by giving to the digraph *th* the sharp explosive character as heard in *eighth*. The movement from *f* to *th* should be smooth, and without hiatus.

ty pog' ra phy, tī-, or tī-, Wb., P.; tī-, Wr.

uhlans, ū' lānz, Wb., P.; ū'-, or ōō'-, Wr.

um bra' ge ous, Wr.; -jus, Wb., P.

umlaut, ōōm' lout, Wb., P.; ōōm'-, Wr.

ōrb, ūse, ūp, ūrn, ōōze, ōōt, ōl, out, ūis, thin, batōn, étūde.

uncourteous, un cârt' é us, Wb.; -kêrt' yus, P.; -cûrt' e us, or -côrt' yus, Wr.

un der neath, un der nêth', or -nêth', Wb., P.; -nêth, Wr.

un err' lug (-êr-), Wr.; -êrr-, Wb., P. It will be observed that Wr. follows the law of accent, while Wb. and P. follow the law of derivation. As the former is the stronger law, the word should be pro. as given in the body of the book. Wb. concedes a point in marking with *short e* the following: érrable érrableness, érror, érrorist.

un scathed', -skâtht', or -skâthd', Wr. While Wb. and P. do not give this word, they pro. *scathed*, skâtht, or skâthd.

Ural, ú' râl, Wb.; ú' râl, Wr., L.; öö-râl, P.

Uruguay, öö röö gwí', or ú' röö gwá. Wb.; ú' röö gwá, or öö röö gwí', P.; öö röö gwí', Wr., L.

U' ri el, ú' rí êl, Wb., P.; ú' rí êl, or ú' rí' êl, Wr.

Uz zí' el, or úz'-, Wb., P., Wr.

vac' elne, sín, or -sín, Wb., P., Wr.

val' et, Wr.; -êt, or -â, Wb., P.

valse, vá lêce, Wb., P.; -lêz', or -lêz', Wr.

Valladolid, vâl yâ dô léd', Wr., Wb.; vâl lá dô líd', P.; vâl lá dô-líd', L.

Vulparalso, vâl pâ rí' sô, Wb., P., Wr., L. Local pro. applied to towns in U. S., vâl' pâ râ' zô, L.

va' rî o loid, or vâ'-, Wb., P.; vâ'-, Wr.

vase, vâce, Wb., P.; vâz, or vâce, Wr. Eng. pro. vâz, or vâz, P. Wb. says that in Eng. it is more commonly pro. vâz, though by some, vâz, and by a few, vawz.

vaut, vânt, Wb., P.; vawnt, or vânt, Wr.

venison, vên' í zn, or vên' zn, Wb., P.; vên' zn, or vên' í zn, Wr.

vermicelli, vër mē chél' í, or -sél' í, Wb., P.; -chél' í, Wr.

ver' í go, Wb., P.; vër' í go, or vër' í', or -lê-, Wr.

vignette, vîn yét', or vîn'-, Wb.; -yét', P.; vîn' yét, or -yét', Wr.

Vincennes, vîn sênz', Wb., P., L. la France, vâñ sên'; la U. S., vîn sênz', Wr.

vi rû' go, ví-, Wb., P.; ví-, or ví-, Wr.

vi rîl' í ty, ví-, or ví-, Wb., P.; ví-, Wr.

vir' n lent, vír' öö lent, Wb., P.; -ö-lent, Wr.

vi tú' per ate, ví-, Wb., P.; ví-, or ví-, Wr.

waist' coat, Wb., P.; wâs' cöat, or wês' cöt, Wr. Colloquially, wês'-kât, Wb., P.

Waldenses, wöl dên' seez, Wb.; wâl-, Wr. [P.]

walnut, wawl' nût, Wr.; wöl'-, Wb., want, want, Wb., P. As a noun,

want; as a verb, want, or wont, Wr.; as a vulgar contraction of *was not*, wâ'n't, Wb. [Wr.]

wa' rily, wâ'-, Wb., P.; wâre'- or wâ'-, Wednesday, wênz' dy, Wb., P.; -day, Wr.

were, wêr, Wb., P., Wr. One class of careless speakers pro. this word wâr, and another class, wâre. Both forms should be studiously avoided. In the sense of *a dam*,

or *a fine*, it is pro. wêre.

wharf, hwârf, Wb., P. Wr. Broad *a*, like *long a. e. í. o u oo*, will not unite closely with *r*. The *a* of this word approaches *ö*.

whereof, whâr öff, or -öv, Wb., P.; -öff, Wr.

where with', or -with', Wb., P.; -with', Wr.

wholly, hól' í, Wb., P. Wr. Pronounce with double *l*, as in *solely*. Distinguish it from the adj., *holy*. Avoid *hully*.

whooping-cough, hööp' ing-kawf, Wb., P.; -kôf, Wr.

whorl, hwârl, or hwôrl, Wb.; hwêrl, or hwôrl, P.; hwârl, Wr.

Winnipegsee, wín' nê pé saw' ke, Wb., Wr.; -pí sôk' í, P. Now generally spelled *Winnipegsee*.

with, with Wb., P., Wr. When it means a twig or withe, it is pro. with. When it is used as a prefix, the *th* is vocal; when used as a suffix it is generally aspirated.

won't, wönt, Wb., P.; wönt, or wânt, Wr. Commonly pro. wünt, or wöönt in New England, Wb.

Woolwich, wōōl' Ij, Wb., Wr.; -Ich, or -Ij, P.

worsted, wōōs' ted, Wb., P.; wōōrst'-ed, Wr. In the sense of *defeated* it is pro. wūrst' ed.

wound, wōōnd, or wound. Wb., P., Wr. While the dictionaries prefer wōōnd, analogy is wholly in favor of *wound*.

wrāth, Wb., P.; rāth, or rawth, Wr. wroth, rawth, Wb., P.; rawth, or rōth, Wr.

Xeres, hā rēth', Wb., Wr. In Sp., hā rēs'; in Pg., shā rēs', or shēr ēs', P.

Xingu, shēen gōō', Wb., P.; shīng-gōō', Wr.

xiphoid, zīf' old, Wb., P.; zīf'-, or zī'-, Wr.

yea, yā, or yē, Wb., Wr.; yā, P. Yenisei, yēn ē sā' ē, Wb., Wr.; yēn'-ē sā' ē, or yēn ē sā', P.

yolk, yōlk, or yōk, Wb., P.; yōk, Wr.

Ze rub' bā bel, Wb., P.; -rüb'-, or -bā' bel, Wr.

zouave, zwāv, or zōō āv', Wb., P.; zōō āv', Wr.

Zuyder, zol' der, Wb., Wr.; zī' der, L., P.

ōrb, ūse, ūp, ūrn, ōōze, fōōt, oil, out, tūis, thin, baton, étude.

ADDENDA.

answer, ān' ser, Wb., P.; ān-, Wr.

ballet, bāl' lēt, or bāl' lā, Wb.; bāl lā', or bāl' let, Wr.; bāl' lā, P.

moiety, mol' ē tī, or maw' ē tī, Wb.; moi' ē tī, Wr., P.

declinatory, dē klīn'-, Wr.; dē klīn'-, Wb.

demurrer, dē mūr' ēr, Wr.; -mūr'-, Wb.

Kyrie eleeson (spelling of Wr.), kīr' i ē ē lē' ē son, Wr.
